Movies such as “Casino” and “Godfather Part II” have glamorized and taken great liberties (under the guise of literary license) in fictionalizing various events that in most cases greatly depart from the actual facts concerning the operation, licensing and regulation of casinos in Nevada and Las Vegas, with the result that many people still believe what’s been shown in the movies and that the “mob” still controls these casinos, even though the contrary is true.

During this program, our panelists we will examine some of the scenes and events depicted in these movies and separate fact from fiction, setting the record straight. Our panelists will share their stories as Nevada state gaming regulators and as witnesses to some of the actual events that were fictionalized in these “mob” movies about Las Vegas.

Our panelists will share their experiences and take your questions on what it was really like going up against and dealing with the likes of real mobsters and famous mob lawyers in Las Vegas. In doing so, they will provide you with an understanding of the actual history of casino regulation in Nevada and Las Vegas, and what is really involved in the very strict regulation of these casinos that exists today.
